Download printer drivers from ij.start.canon and then install and set up Canon printer and scanner device. Whether you are a new or an old canon printer user, visit the official website to download the drivers. ij.start.canon offers online manuals and recommended functions to provide a better understanding. Here are a few simple steps to set up your new Canon printer.

A QUICK GUIDE TO DOWNLOAD IJ.START.CANON PRINTER DRIVERS

1. Open a web browser on your laptop or PC.
2. Tap the web address bar and type ij.start.canon. After that, press the Enter button on the keyboard.
3. Click the Setup tab to proceed further.
4. Enter your Canon printer model name in the search box. You can also select your Canon printer model name from the list by scrolling down.
5. Select your operating system from the top-right side. After that, click Download to start the downloading process.
6. You might need to tap the Save option based on the web browser.

INSTALL CANON PRINTER DRIVER THROUGH IJ.START.CANON

Follow these steps to install the latest [ij.start.canon](#) printer drivers on your device without any error or issue:

1. Locate the [ij.start.canon](#) driver file on your device.
2. Run the file to initiate the installation process on the laptop or PC.
3. Accept the software license and agreements to proceed further.
4. Tap the Start Setup tab in the driver installation window.
5. You will get a few connection methods on the screen.
6. Select any one connection method and follow on-screen instructions.
7. Select your Canon printer model name if the list of printers appears. After that, click the Exit option to complete the [ij.start.canon](#) installation process successfully.

HOW TO LINK USB CONNECTION SETUP ON CANON PRINTER?

1. Install the **ij start canon** printer drivers on your device.
2. Stop all the background applications or software on the PC.
3. Select the USB connection method during the Canon printer driver installation process.
4. Connect the USB cord to your printer and PC.
5. Finish the USB setup connection by following on-screen prompts.
6. Click on the Exit button to close the installation window.
7. Add your ij.start.canon printer manually on the device.
8. Restart your PC or laptop to conclude the USB connection method.

STEPS TO SETUP WIRELESS CONNECTION ON CANON PRINTER

1. If your Canon printer has a Direct button, then press the Direct button.
2. You can also select the Wi-Fi or WPS button.
3. After that, click the Wireless LAN option from the printer's display.
4. Press the WPS button available on your Wireless router or hub.
5. You will get Wi-Fi lights on your printer once it connects to your wireless network.
6. Connect your laptop or PC with a similar network.
7. Add your **ij.start.canon** printer to the list and send print commands.
